DETAILED ACTION

1. This office action acknowledges receipt of the following items from the Applicant:
 - Supplemental Response to restriction filed on 2/04/05.
 - Claims 1-20 had been canceled.
 - Claims 21-31 are newly added.
 - Claims 21-31 are pending in the application.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21-27, drawn to a phase change memory device, classified in class 365, subclass 148.
 - II. Claims 28-31, drawn to a programming metallization cell memory (PMCM), classified in class 365, subclass 153.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions **II** and **I** are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention **II** has separate utility such as **claims do not require thin metal layer**. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. A telephone call was made to Hai Jiang on 11 April 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
